

SCRUM EXAM

February 11-14, 2026

QUESTION

Describe how the Scrum Guide 2020 defines Scrum as a framework

↺ Press to flip

Card 1 of 20

ANSWER

Scrum is defined as a lightweight framework that helps people, teams, and organizations generate value through adaptive solutions for complex problems. It provides a minimal set of roles, events, and artifacts with associated rules. The framework is intentionally incomplete, leaving many practices up to the team. Its lightweight nature aims to maximize flexibility and empiricism.

QUESTION

Explain the concept of empiricism in Scrum

🔄 Press to flip

Card 2 of 20

ANSWER

Empiricism in Scrum means decisions are made based on what is observed, experienced, and measured. It relies on the pillars of transparency, inspection, and adaptation. Scrum events and artifacts are designed to enable frequent inspection of progress and rapid adaptation. This approach is particularly suited for complex, unpredictable work.

QUESTION

List and define the three pillars of Scrum

🔄 Press to flip

Card 3 of 20

ANSWER

Scrum rests on three pillars: transparency, inspection, and adaptation. Transparency ensures that significant aspects of the process and work are visible and understood by those responsible for the outcome. Inspection involves frequent checks of artifacts and progress toward a Sprint Goal. Adaptation means adjusting processes or work as soon as possible when deviations or problems are detected.

Card 3 of 20

QUESTION

Describe the Scrum Team as defined in the 2020 Scrum Guide

🔄 Press to flip

Card 4 of 20

ANSWER

The Scrum Team is a small team of professionals focused on one product at a time. It consists of one Scrum Master, one Product Owner, and Developers, with no sub-teams or hierarchies within the team. The entire Scrum Team is accountable for creating a valuable, useful Increment every Sprint. They are self-managing, deciding who does what, when, and how.

Card 4 of 20

QUESTION

Explain the change to the Development Team concept in the 2020 Scrum Guide

🔄 Press to flip

Card 5 of 20

ANSWER

The 2020 Scrum Guide removed the separate “Development Team” concept and instead refers simply to “Developers” within the Scrum Team. This emphasizes that there is one unified team without internal sub-teams or silos. All members share collective accountability for value and outcomes. The distinction helps reduce internal barriers and promotes joint ownership of the Increment.

Card 5 of 20

QUESTION

Define the accountability of the Product Owner

🔄 Press to flip

Card 6 of 20

ANSWER

The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. This includes managing the Product Backlog, clearly communicating Product Goal and backlog items, and ensuring the backlog is transparent and understood. The Product Owner may delegate work but remains accountable for the result. They focus on value and stakeholder collaboration rather than detailed task management.

↺ Press to flip back

Card 6 of 20

QUESTION

Define the accountability of the Scrum Master

🔄 Press to flip

Card 7 of 20

ANSWER

The Scrum Master is accountable for establishing Scrum as defined in the Scrum Guide and for the Scrum Team's effectiveness. They serve the Scrum Team by coaching in self-management, facilitating Scrum events, and removing impediments. They also serve the organization by leading, training, and coaching in Scrum adoption. The Scrum Master is a true leader who promotes empiricism and continuous improvement rather than a project manager.

QUESTION

Describe the accountability of the Developers in the Scrum Team

🔄 Press to flip

Card 8 of 20

ANSWER

Developers are accountable for creating any aspect of a usable Increment each Sprint. They plan the Sprint by creating the Sprint Backlog, adapt their plan each day toward the Sprint Goal, and hold each other accountable for quality.

Developers must meet the Definition of Done for work to be included in the Increment. Their skills are cross-functional, enabling the team to deliver end-to-end value.

QUESTION

Explain what a Sprint is and its timebox

🔄 Press to flip

<

Card 9 of 20

>

ANSWER

A Sprint is a fixed-length event of one month or less during which a Done, usable Increment is created. Sprints have consistent durations throughout a development effort to establish a rhythm. Work during a Sprint is focused on achieving a Sprint Goal aligned with the Product Goal. The Sprint contains and encompasses all other Scrum events.

Card 9 of 20

QUESTION

Describe the purpose and key elements of Sprint Planning

🔄 Press to flip

Card 10 of 20

ANSWER

Sprint Planning initiates the Sprint by answering three questions: Why is this Sprint valuable, what can be done in this Sprint, and how will the chosen work get done. The Product Owner proposes how the product could increase its value and utility in the upcoming Sprint. The Scrum Team then crafts a Sprint Goal, selects Product Backlog items, and creates a plan for delivering them. It is a collaborative event involving the entire Scrum Team.

Card 10 of 20

QUESTION

Explain the Daily Scrum purpose and format in the 2020 Scrum Guide

🔄 Press to flip

Card 11 of 20

ANSWER

The Daily Scrum is a 15-minute event for Developers to inspect progress toward the Sprint Goal and adapt the Sprint Backlog as necessary. It is held at the same time and place each working day of the Sprint. The Guide no longer prescribes specific questions; instead, Developers can structure it in any way that focuses on progress and adaptation. The Product Owner and Scrum Master may attend as participants if they are also working on Sprint Backlog items.

🔄 Press to flip back

Card 11 of 20

QUESTION

Describe the Sprint Review and its focus

🔄 Press to flip

ANSWER

The Sprint Review is held at the end of the Sprint to inspect the outcome of the Sprint and determine future adaptations. The Scrum Team presents the Increment to key stakeholders and discusses what was accomplished and what has changed in the environment. The goal is to collaborate on the next steps and adjust the Product Backlog if needed. It is not just a demo, but a working session focused on product direction and value.

↺ Press to flip back

Card 12 of 20

QUESTION

Explain the purpose of the Sprint Retrospective

🔄 Press to flip

Card 13 of 20

ANSWER

The Sprint Retrospective is an event for the Scrum Team to inspect how the last Sprint went regarding individuals, interactions, processes, tools, and Definition of Done. The team identifies the most helpful changes to improve quality and effectiveness. They often add at least one high-priority improvement to the next Sprint Backlog. This event fosters continuous improvement and strengthens team cohesion.

🔄 Press to flip back

Card 13 of 20

QUESTION

Define the Product Backlog and its characteristics

🔄 Press to flip

Card 14 of 20

ANSWER

The Product Backlog is an emergent, ordered list of what is needed to improve the product. It includes Product Backlog items that specify value, ordering, and size but can be refined and changed over time. The Product Owner is accountable for its content, ordering, and availability. It represents all known work for the product and becomes more detailed closer to implementation.

🔄 Press to flip back

Card 14 of 20

QUESTION

Describe the Sprint Backlog and what it contains

🔄 Press to flip

Card 15 of 20

ANSWER

The Sprint Backlog is the set of Product Backlog items selected for the Sprint, plus a plan for delivering them, and the Sprint Goal. It is created by Developers during Sprint Planning and updated throughout the Sprint. The Sprint Backlog is a highly visible, real-time picture of work the Developers plan to accomplish. Only Developers can change it, as they learn more about the work during the Sprint.

QUESTION

Explain what an Increment is in Scrum

🔄 Press to flip

<

Card 16 of 20

>

ANSWER

An Increment is a concrete stepping stone toward the Product Goal, representing a usable piece of the product. It must meet the Definition of Done to be considered complete and usable. Multiple Increments may be created within a single Sprint. All Increments are additive and must integrate seamlessly with previous Increments.

🔄 Press to flip back

Card 16 of 20

QUESTION

Define the Product Goal introduced in the 2020 Scrum Guide

🔄 Press to flip

Card 17 of 20

ANSWER

The Product Goal describes a future state of the product that can serve as a long-term objective for the Scrum Team. It provides a single focus for the Scrum Team at a time, guiding what is included in the Product Backlog. The team works toward one Product Goal before moving to the next. Each Sprint should move the product closer to achieving this Product Goal.

🔄 Press to flip back

QUESTION

Describe the Definition of Done and its importance

🔄 Press to flip

Card 18 of 20

ANSWER

The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product. It ensures transparency by making clear what “Done” means for everyone involved. Work not meeting the Definition of Done cannot be released or even presented at the Sprint Review as part of the Increment. It may be a standard organization-wide definition or created by the Scrum Team if none exists.

🔄 Press to flip back

Card 18 of 20

QUESTION

List and explain the five Scrum values

🔄 Press to flip

Card 19 of 20

ANSWER

The five Scrum values are commitment, focus, openness, respect, and courage.

Commitment encourages team members to support the goals of the Scrum Team. Focus helps everyone concentrate on the work of the Sprint and the goals of the team. Openness fosters transparency about work and challenges, respect ensures people value each other as capable, and courage empowers them to do the right thing and tackle tough problems.

QUESTION

Explain how self-managing teams are emphasized in the 2020 Scrum Guide

🔄 Press to flip

<

Card 20 of 20

>

ANSWER

The 2020 Scrum Guide emphasizes that Scrum Teams are self-managing, meaning they decide who does what, when, and how. This is an evolution from the earlier term “self-organizing,” highlighting greater autonomy in both structure and work execution. Self-management is supported by clear goals, empiricism, and the Scrum values. It aims to increase ownership, adaptability, and speed of decision-making within the team.
